The equipment for the vehicle illustrated can be found on page 61.

The fuel consumption and CO₂ emission figures can be found on page 54.

The most attractive way of going your own way.

Why only use the same beaten tracks as everyone else?
In the Audi A6 allroad quattro you have found a vehicle you
can use to discover completely new roads for yourself.

Choose the engine that best suits you from our range of TFSI® and TDI engines. Go for a distinctly attractive and expressive design. Enjoy the freedom that both the interior and the load area offer. And last but not least: experience the A6 allroad quattro in your own personal way. Both on and offroad. Wherever your ideas take you – the A6 allroad quattro will get you to your destination.

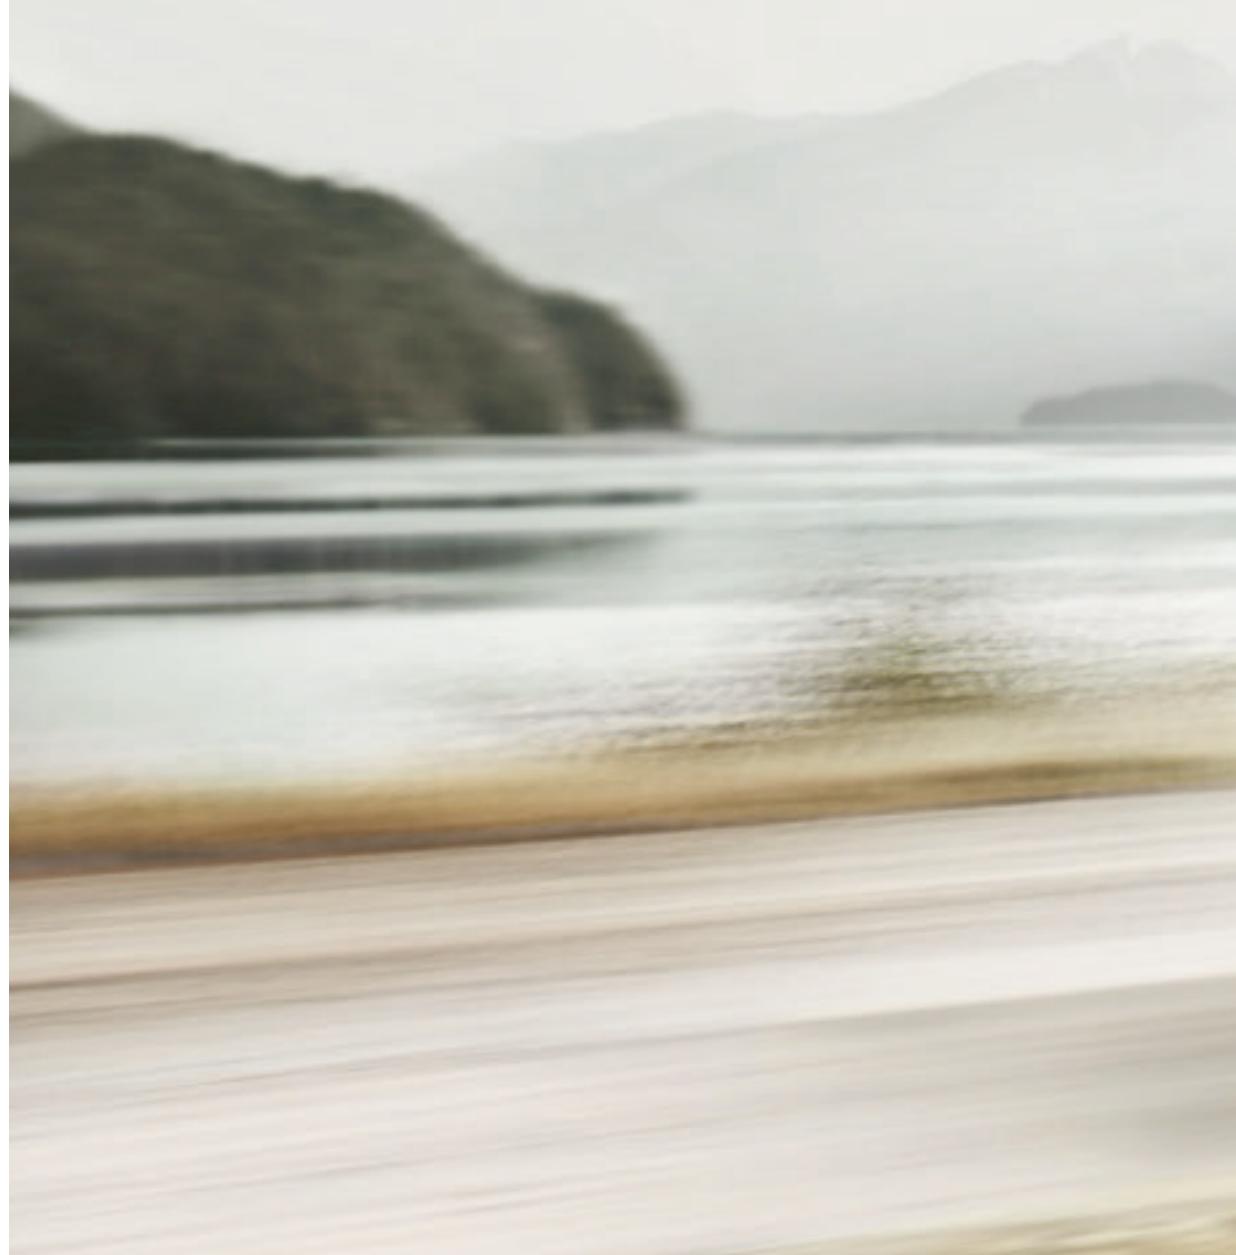

The fuel consumption and CO₂ emission figures can be found on page 54.

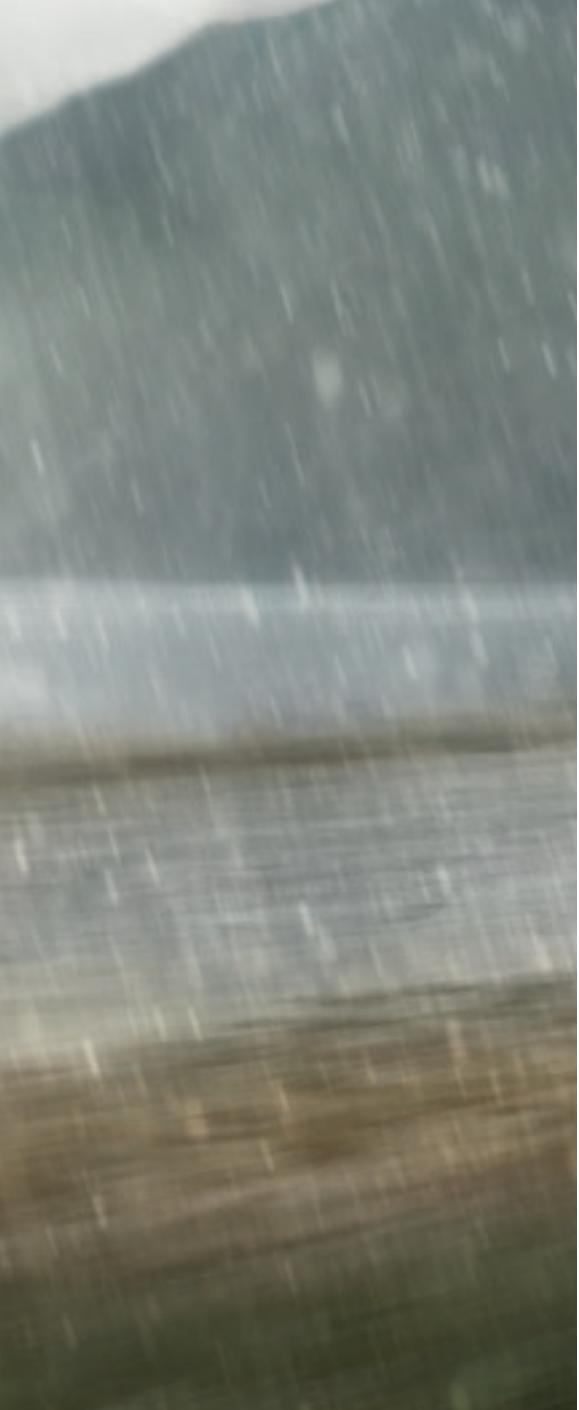

The most powerful way of going your own way.

No matter which of the engines you choose for your Audi A6 allroad quattro: there are six cylinders available for you in each engine. The high-torque engines, available with a choice of TFSI® or TDI technology, accelerate irresistibly – and are efficient at the same time. Recuperation allows them to use their power sensibly and intelligently. And: they can move a trailer load of 2.5 tonnes without any effort. This strength gives you even more independence and flexibility.

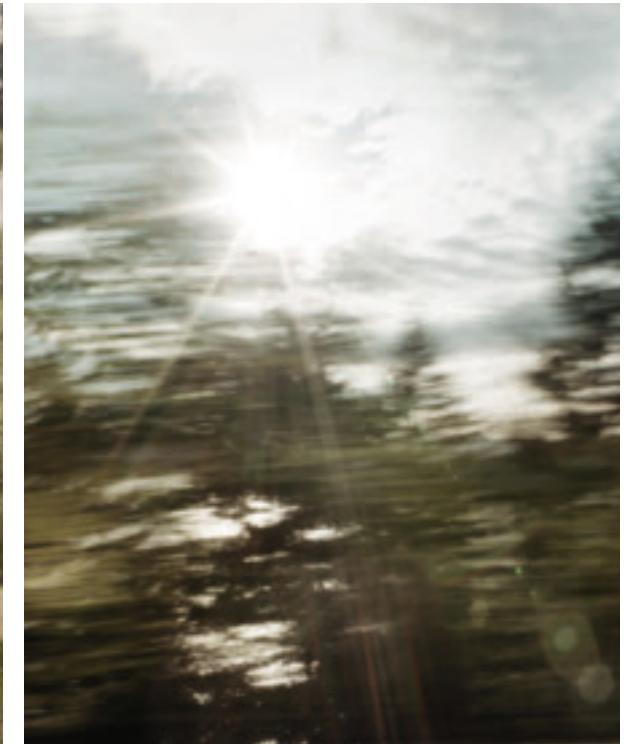

Just as forward-looking: the aluminium hybrid construction used in the A6 allroad quattro. This Audi ultra component saves on fuel and makes the vehicle even more agile. The sporty driving experience is rounded off by quattro® permanent all-wheel drive – which gave the vehicle its name. On request, quattro is available with sports differential, which distributes variable amounts of power to each rear wheel and ensures impressive acceleration performance in corners. On almost any road and even in bad weather.

The fuel consumption and CO₂ emission figures can be found on page 54.

Test the A6 allroad quattro on different terrains. The standard tilt angle display provides a graphical representation of the vehicle on slopes or gradients. The hill descent control maintains your selected speed on the downhill drive if required, while ESP improves the directional stability of the vehicle – on level roads or uphill drives too, of course. Can you resist the temptations of offroad driving?

The fuel consumption and CO₂ emission figures can be found on page 54.

Unmistakably an A6 Avant, even more unmistakeably an A6 allroad quattro. The vehicle stands out through its masculine appearance and streamlined body, wheel arch extensions, Singleframe with vertical struts and an underbody protection which covers the whole width of the bumper. Optional stainless steel inlays in the sills emphasise the side. A roof spoiler and roof rails with high webs highlight the striking silhouette.

People with plans need the space to make these plans happen – the A6 allroad quattro has the space you need. Its luggage compartment provides 565 litres of space, and with the rear seats folded down completely this even increases to 1,680 litres; the rear seat can be split-folded 40 : 60, either manually directly at the seat or with particular ease using the remote backrest unlocking function.

The most individual way of going your own way.

A powerful appearance in every colour. The new paint finish Java brown, which is available exclusively for the A6 allroad quattro, is a real eye catcher. The characteristic allroad quattro Singleframe is designed in an aluminium look. The wheel arches also deserve special attention: extended wings and wheel covers in a contrasting colour or painted in body colour on request are a visible sign of the vehicle's solid stance. The special shape of the optional LED headlights leaves a unique impression.

The fuel consumption and CO₂ emission figures can be found on page 54.

Keeping your eye on the path ahead: thanks to the standard tilt angle display, you always know immediately what position your Audi A6 allroad quattro is in when you are covering uneven ground. This makes adjustment during driving very easy. And every path a little less challenging.

The fuel consumption and CO₂ emission figures can be found on page 54.

When you get in the Audi A6 allroad quattro, you are greeted by a truly special atmosphere. The generous interior is calming, the inlays in optional aluminium fascinating – in particular the ones in aluminium solar* which are reserved especially for the A6 allroad quattro – just like the interior colour Santos brown or the Sierra/mono.pur 350 cloth. On request, sports seats in leather with exclusive contrasting stitching will support you very well. If you like, your A6 allroad quattro can be fitted with a sophisticated jacquard floor mat. This is optionally available in velour – for even more individuality and class.

The optional head-up display projects important information onto the windscreen, allowing you to drive attentively and yet be relaxed at the same time.

The MMI® Multi Media Interface has many talents. You are informed about various vehicle functions on the colour display; the optional parking system plus with 360 degree camera maps the area behind your vehicle on screen. If you like, the park assist with its display of the vehicle's surroundings and rearview camera will indicate suitable parking spaces along the road and guide the A6 allroad quattro into them automatically, while all you have to do is press the accelerator or brake pedal.

The MMI can do even more on request: the MMI® navigation plus with MMI® touch has a touch-sensitive control panel where you can “write” letters and numbers with your finger. In conjunction with Bluetooth car phone online, the use of Audi connect services such as navigation with Google Earth images and Street View is also possible.

* For information on when this feature will be available, please contact your Audi partner. The fuel consumption and CO₂ emission figures can be found on page 54.

Free spirits need open roads. And ways to adapt their vehicle to this road. The standard adaptive air suspension automatically regulates the vehicle height and damping. The optional Audi drive select allows you to choose between five pre-sets which raise the A6 allroad quattro up to 18.5 cm above the ground – a full 6 centimetres more than is available in the A6 Avant. On request, you can be supported by dynamic steering which adapts both steering ratio and steering effort to the respective requirements. Removing practically all obstacles to your clear run.

The fuel consumption and CO₂ emission figures can be found on page 54.

Breathtaking terrain, challenging roads – just right for a powerful vehicle like the A6 allroad quattro. Yet it makes the most of its strengths in urban traffic, too, and exudes pure exclusivity every inch of the way. Use every road available to you – and discover new ones.

The right vehicle is ready for you. The new Audi A6 allroad quattro.

Audi ultra.

The future of automotive lightweight construction.

The "Vorsprung" of the new Audi A6 allroad quattro is already noticeable at a distance. The impression is reinforced when breaking the vehicle down to its individual parts. The innovative Audi ultra lightweight technology clearly demonstrates how lightweight and forward-looking the construction really is. This has been possible only through 20 years of experience acquired at the Audi lightweight centre in Neckarsulm.

Compared to other cars of its class, the Audi A6 allroad quattro is not just built of steel, it features an aluminium hybrid design. It is a lightweight technology that until now has been applied

predominantly to sports car manufacturing, and with a reduced consumption that delivers greater agility and thus increased efficiency.

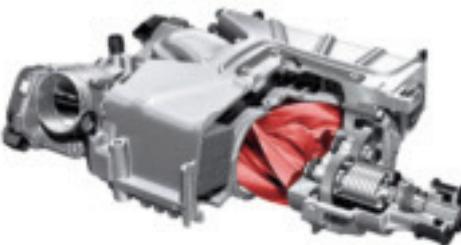

Thanks to the Audi ultra aluminium hybrid design, the weight can be reduced in many areas of the Audi A6 allroad quattro. This begins with the suspension: aluminium components on driving components such as the steering, swivel bearings and wheel carriers contribute enormously to weight reduction. The bodywork is a further major area for the use of aluminium. Aluminium is the material used for the bodywork structure and all attached elements. Doors, bonnet, tailgate and wings are all constructed from the rigid

lightweight metal. Technologies are used in the bodywork to enable varying levels of thickness and material properties within a single element. With Audi ultra, the material is used exactly where it is required – without increasing weight in other areas. The result is a vehicle whose lower weight is clearly noticeable: through a sporty agility as well as through comparatively low fuel consumption and CO₂ emissions.

Many hours of development.
Thousands of miles of testing.
And for what reason?

- Timing drive chain
- High-pressure pump
- Integrated charging module
- Switchable water pump

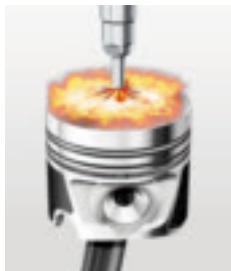

The supercharger is a central element for the boost pressure generation. Or, put another way, it ensures outstanding torque even at low engine speeds. The supercharger is a highly integrated, mechanical charging module situated between the two cylinder banks. The rotor unit, the electrically controlled butterfly valve in the bypass bend and the engine-side heat exchanger of the indirect charge air cooling system are integrated in one single-piece cast metal housing. The 4-blade rotors mounted on an anti-friction bearing compress by 160° and are covered with a coating which allows the gap dimensions in the construction to be kept to a minimum.

In just a few seconds you will understand why.

TFSI® technology is employed in the new Audi A6 allroad quattro. And the remarkable thing about it is that it combines the advantages of FSI® with a supercharger, which ensures even better power delivery. The 3.0 TFSI quattro generates 228 kW of power. An innovative mechanically-driven supercharger system with intercooler is

employed here and turns the 6-cylinder engine into a compact powerhouse with moderate fuel consumption. The peak torque of 440 Nm is sure to impress you, as will the torque curve: with at least 90% of the maximum torque being available across an engine speed range of 2,900 to 4,500 rpm.

Thanks to its very spontaneous responsiveness and exceptional power delivery across the entire engine speed range, the 6-cylinder engine promotes a particularly dynamic driving style. The A6 allroad quattro accelerates to 100 km/h in 5.9 seconds – at the same time fulfilling the EU5 emission standard of course.

The piezo injectors open and close in fractions of a millisecond and inject fuel several times into the combustion chamber at pressures of up to 1,800 bar. In some cases, an injection process can involve the injection of the tiniest of amounts weighing less than a thousandth of a gram.

Pre-injection results in a “gentle” combustion process and consequently excellent combustion acoustics and agreeable engine running characteristics.

TDI.

In other words: Where is the tank?

One in every two Audi cars sold today is a diesel. What we take for granted now was quite a sensation a mere 20 years ago when Audi revolutionised the market with the first 2.5 litre TDI engine. Since then, developments such as common rail technology have made TDI even more efficient. Piezo injectors ensure the fuel is finely and precisely distributed. Consequently, since the first TDI, the engines have become more

economical, whilst specific output has increased. So it was only logical that a diesel car should then enter the world of motorsport. And successfully too: in 2006, Audi was the first car maker to win the Le Mans 24 Hours with a diesel-powered race car, the Audi R10 TDI – and then went on to repeat this victory several times over, most recently in 2011. Four powerful TDI versions are available for the

Audi A6 allroad quattro, which of course operate with intelligent common rail diesel technology. With a hefty 650 Nm of torque, the 230 kW 3.0 TDI tiptronic accelerates your A6 allroad quattro from 0 to 100 km/h in 5.6 seconds. The engine version with 150 kW takes you to 100 km/h after 7.5 seconds. And the 3.0 TDI with 180 kW and 580 Nm proves that efficiency does not prevent driving pleasure.

Exhaust-gas turbocharger with optimised
adjustable turbine geometry

1,800 bar high-pressure injection system

Engine with reduced friction

Pressure-regulated oil pump

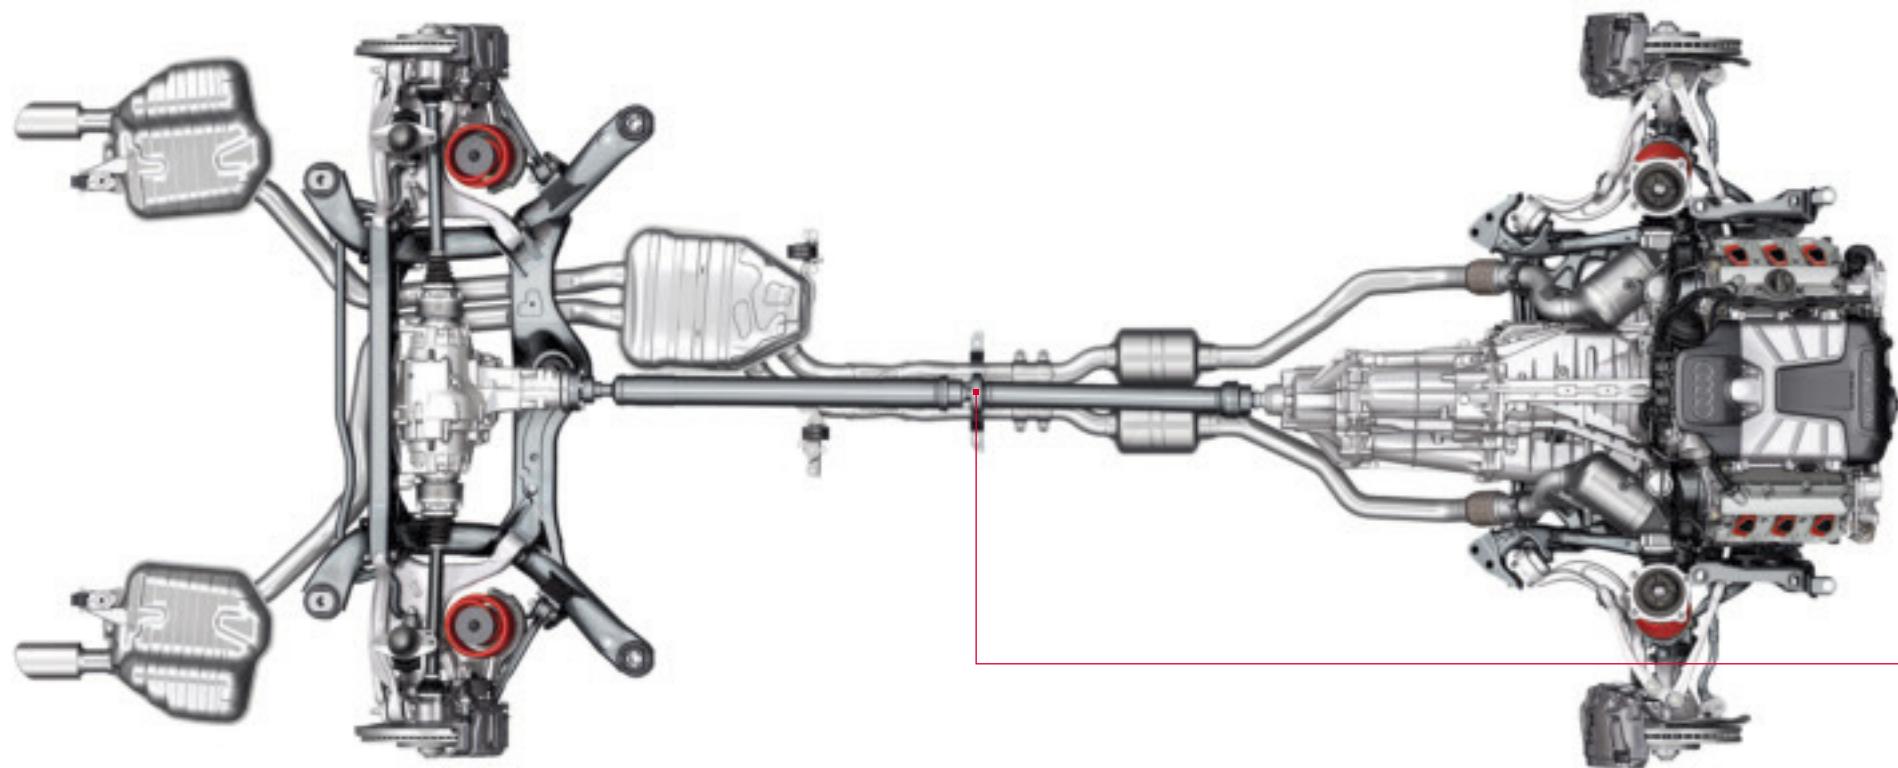

Innovative thermal management with separate cooling
system for engine block/cylinder head

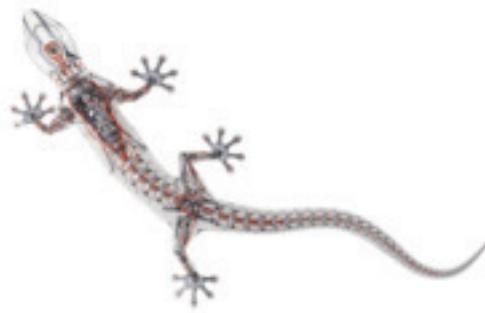

3.0 TDI engine (180 kW)

With quattro®
we created one of the best all-wheel drive systems in the world.

Of course, that was not good enough for us.

quattro® is a permanent all-wheel drive system. If the wheels on one axle of the vehicle lose grip on the road and threaten to spin, then the power is transferred to the other axle – automatically and permanently distributed through the self-locking centre differential. The basic distribution is 40 : 60 – 40% of the driving power comes from the front axle, 60% from the rear. The benefit is better traction during acceleration and improved safety due to exceptional grip. So much for the technology. But what makes quattro unique is really the driving feel. "As if you are stuck to the road," some customers say. We put it like this: quattro gives you a better feel for the road and thus more safety.

The optional quattro® with sports differential further reinforces this unmistakeable quattro feeling. Vehicles tend to understeer when steering or driving into corners. This is a normal

physical process: a moving object opposes a change in direction. The elastic tyres and the suspension mounts tense up until the new direction has been adopted. When accelerating into a corner, the load on the front axle is reduced and it therefore transfers less lateral force to the tyres – the vehicle understeers.

With the sports differential on the rear axle, the tendency to understeer is largely counteracted. This is because the quattro rear axle differential has been extended left and right by a clutch system with two gear levels. They ensure that the individual wheels on the rear axle receive different levels of torque. The clutches are activated by an electro-hydraulic actuator. Depending, for example, on the steering angle, lateral acceleration, yaw angle and driving speed, the system calculates the right distribution of wheel torque for any driving situation. In this way

the power is specifically channelled to the outer rear wheel, when steering or accelerating into a corner. The effect: the vehicle is effectively pressed into the corner and follows the angle of the front wheels. The variable left and right driving forces also help stabilise the steering and the usual steering corrections are hardly necessary.

quattro® with sports differential
continuously varies the amount of driving force distributed to each rear wheel and ensures high cornering agility and impressive driving dynamics.

Phone: The optional fitting for mobile phone (Bluetooth) or the Bluetooth car phone online have a menu screen with call lists, address book and selection interface as the initial setting.

MMI® touch: You can “write” with your finger on the MMI touch. The system recognises letters and numbers. It can be used for navigation and for your phone. In jukebox mode, you can also thumb through the albums of your music collection with a brief stroke of the finger.

Navigation system: The hard disk navigation system MMI navigation plus with MMI touch provides a 3D map view and a three-dimensional representation of well-known buildings and sights.

Media: Display of available media sources such as jukebox, inserted SDHC cards, Audi music interface or CDs and DVDs; display of optional TV tuners

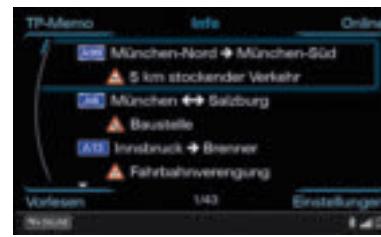

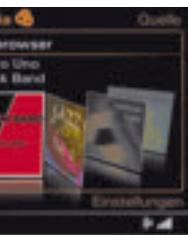

Follow your intuition – and you'll get there.

We try to match up to our claim of “Vorsprung durch Technik” in every aspect of an Audi – such as in the case of the advanced MMI® – Multi Media Interface, for example. The MMI is used to control a wide variety of media in the car, as well as the navigation system and other convenience functions. It used to be simple to operate the MMI – and now it's even simpler. A reduced number of buttons brings greater clarity. The control buttons for the radio and media are logically arranged near the volume control. The six other buttons, known as hard keys, used for example for the phone or for navigation, are on the main turn-and-push control – for intuitive operation. Another new feature is the carousel mode in the MMI display. This makes it even clearer to understand, and you get to your destination even more easily.

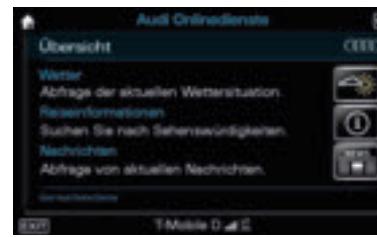

The special thing about the optional MMI® navigation plus is the unique MMI® touch. It is located to the left of the main control panel and within easy reach, especially in conjunction with the new gear selector lever. With the MMI touch you control such functions as navigation in a new and intelligent way – by “writing” letters or numbers with your finger on the touch-sensitive control panel. The system acknowledges your input after each character by means of audible feedback. You can also browse through the albums in your music collection – a flick of the finger is all it takes.

Audi connect: Traffic information online

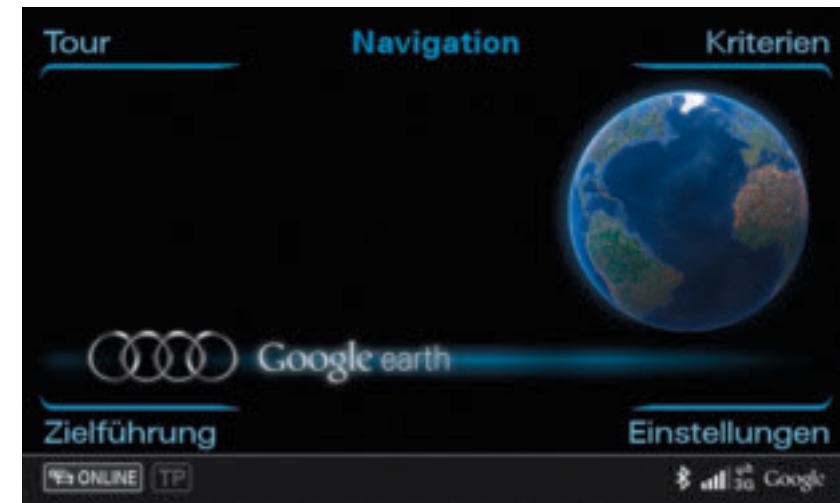

You not only get the right route to your destination but the quickest one too. In addition to traffic flow information, traffic information online provides faster information on the formation and dissolution of traffic jams for dynamic route guidance as well as greater coverage of the road network.

Audi connect: Travel information/weather

Provides weather forecasts and relevant information, such as charts and weather maps relating to the destination.

Audi connect: News online provides comprehensive news items about current world events.

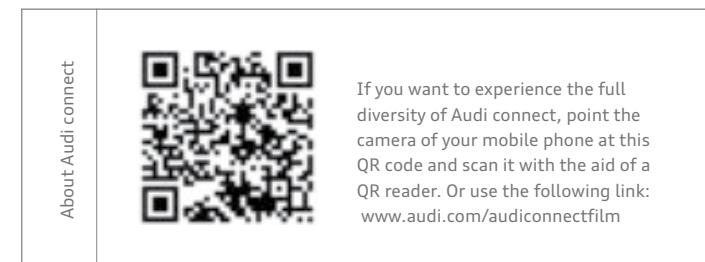

Audi connect: Navigation with Google Earth images and Street View enables navigation with high-resolution aerial and satellite images, photographs, topographical features, roads and their designations, and business entries. In Street View you can form a realistic picture of your destination even before you arrive. With the **point-of-interest (POI)** search function with voice control, you get detailed tips about holiday destinations, opening hours or visitor reviews, and you have access to the entire breadth of the Internet wherever you may be. **Destination input by means of MyAudi or Google Maps** enables you to plan your route on your home computer with individual navigation destinations, and then send it to the vehicle. When you start your journey the planned route is loaded into MMI navigation plus.

Audi connect. Always online, even on the road.

Mobile information services offer the ultimate connection. With Audi connect you can easily search the Internet for any special destinations in the MMI®, or retrieve the latest news and the current weather forecast for the intended navigation destination. Data transfer is by means of the UMTS module of the Bluetooth car phone online, which can be ordered as an option for the MMI® navigation plus with MMI® touch.

One special feature is the **Wi-Fi hotspot**. With a laptop, an iPad or a netbook you can retrieve important information, data and e-mails almost as conveniently as in your office at home. There is an application for **Internet radio*** available for some smartphones. Detailed information about availability, usage rights and charges can be obtained from your Audi dealer.

About Audi connect

If you want to experience the full diversity of Audi connect, point the camera of your mobile phone at this QR code and scan it with the aid of a QR reader. Or use the following link: www.audi.com/audiconnectfilm

* For information on when this feature will be available, please contact your Audi partner.

Efficiency: standard in every Audi.

The direct route to enhanced efficiency is via innovation. For decades, Audi has been continuously providing decisive impetus for the entire automobile industry, thereby proving that effective efficiency is the result of a sustainable strategy. That's why fuel consumption and emission-reducing measures are fitted as standard to all Audi models. The extensive technologies are combined in a model-specific manner and are implemented consistently throughout the entire vehicle fleet.

The Audi Space Frame (ASF), which is used in a range of Audi models, is a milestone in the extensive experience Audi has gained with lightweight construction. With this revolutionary construction method, the weight of the body shell is reduced by about a third in comparison with conventional steel constructions. The latest innovation in lightweight construction: the weight-reducing aluminium hybrid construction used in the Audi A6.

Furthermore, with the TDI, Audi has developed one of the world's most successful diesel technologies. The combination of direct diesel injection and turbocharging provides high efficiency and excellent engine power. Current highlight: the 3.0 TDI clean diesel in the Audi A4 Saloon¹. It already fulfils the EU6 emission standard that does not come into force in Europe until 2014.

Another highlight: the downsizing technology on the TFSI® petrol engines. Five times in succession, the 2.0 TFSI engine has been voted "Engine of the Year"². A new evolutionary stage in efficiency is set by Audi with the Q5 hybrid quattro: as a pioneer of electrical mobility, it marks the entry into a future that will have low emission levels in the long term.

The potential of the frugal TDI and TFSI engines is brought particularly efficiently onto the road with the S tronic dual-clutch transmission with low engine speeds and shorter gearshifting times. And the aerodynamic design of the Audi bodies can contribute to an additional fuel saving through a combination of low drag and low lift.

All measures contribute towards a perfect combination of efficiency and sportiness in every Audi. Today – and also in the future. So that you can at all times feel the demands that we have always placed on ourselves: Vorsprung durch Technik.

¹ Fuel consumption in l/100 km: urban 8.7; extra-urban 5.5; combined 6.7; CO₂ emission in g/km: combined 175.

² The "International Engine of the Year Awards" are awarded by renowned automotive journalists from more than 30 countries: UKIP Media & Events Ltd.; www.ukipme.com/engineoftheyear

Because nobody knows your taste
as well as you do: Audi exclusive.

Each year Audi sells hundreds of thousands of vehicles. Yet they only sell yours once. How is that possible? With the quattro GmbH service, which makes your Audi unmistakeable: Audi exclusive. Paint finishes customised to your concept, fine leather, high-quality Alcantara and selected woods and trim; it is these materials and the precise workmanship which give your Audi its own unique personality. Your Audi partner and the Audi Forum Neckarsulm customisation studio await your wishes.

Audi exclusive interior with sports seats in Valcona leather (Havana brown/alabaster white), inlays in tamo ash, natural dark brown as well as contrasting stitching on the controls. From quattro GmbH

Seat upholstery, headlinings

Sierra/mono.pur 350 cloth

for standard seats, front; seat centre panel in Sierra cloth, seat side bolsters and head restraints in mono.pur 350

Alcantara/leather combination

The Alcantara/leather combination gives the sports seat an exclusive, sporty look. The seat centre sections in Alcantara provide exceptionally good support and are well suited for dynamic driving styles; the side bolsters made from the finest leather complete the look. Thanks to rapid temperature equalisation, this combination offers high levels of seating comfort and a good seating climate. It is particularly hard-wearing, easy to clean and resistant to wear and tear; available for sports seats, front, in black and titanium grey

Milano leather upholstery and trim

seat upholstery, head restraints and front centre armrest (can be ordered as an option) in Milano leather; Milano leather is fully penetrated with dye and lacquered, which offers impressive surface protection. The leather is extremely hard-wearing and durable, tanned without the use of chromium and gives a high-quality impression with its fine, grained surface.

Valcona leather upholstery and trim

seat upholstery, head restraints, door trims, front centre armrest (can be ordered as an option) in Valcona leather and lower part of centre console in leather; Valcona leather is a high-quality leather which contributes to the elegant charisma of the interior. The low use of lacquer allows the material to breathe whilst the non-grained surface underlines the sophisticated character. Valcona leather is tanned without the use of chromium, dyed through and treated with non-fading colour pigments.

Leather-covered armrest in the door trims

Leather package

lower part of centre console and armrest in the doors in leather

Leather package including airbag cover

lower centre console, armrest in the doors, door pull handle in leather and the steering wheel airbag cover leather-covered in black. From quattro GmbH

Audi exclusive leather package including airbag cover

leather trim the same as leather package including airbag cover; individual choice of colour for leather and decorative seams from the range of Audi exclusive colours. From quattro GmbH

Audi exclusive leather upholstery and trim (package 1)

available in Valcona leather and Alcantara/leather. Leather trim for: seats, centre arm rest, door panel insert and lower part of centre console. Optional Alcantara for seat centre sections and door panel inserts. Individual choice of colour for the leather, Alcantara and decorative seams from the range of Audi exclusive colours. From quattro GmbH

Audi exclusive leather upholstery and trim (package 2)

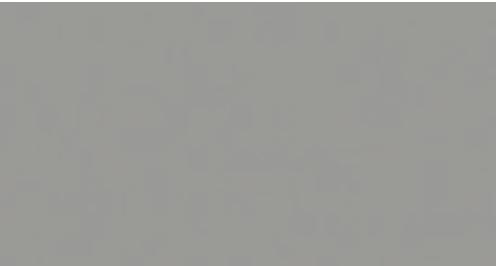

available in Valcona leather. Contents in addition to package 1 are: armrest in the doors, door pull handle and seat backrest cover. Seat attachments in matching colours. Individual choice of colour for leather and decorative seams from the range of Audi exclusive colours. From quattro GmbH

Headlining in cloth

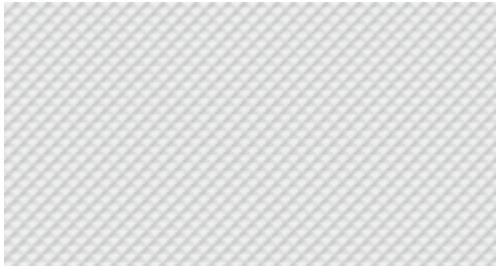

matched to the selected interior colour

Headlining in black cloth

can also be ordered optionally for all interior equipment

Reflex finish, steel grey

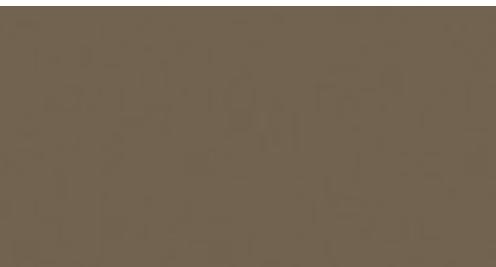

Aluminium delta

Fine grain ash, natural brown

Inlays in reflex finish

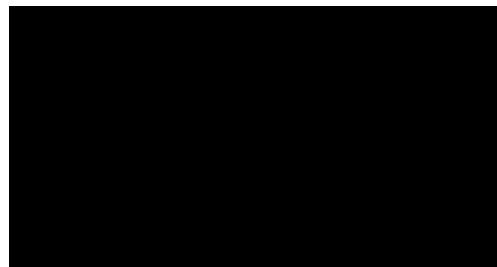

large area inlay for dashboard, centre console, door trims and surrounding inlay. In steel grey for interior equipment in black and titanium grey. In moor brown for interior equipment in Santos brown and velvet beige.

Reflex finish, moor brown

Beaufort oak

Piano finish black
From quattro GmbH**Inlays in aluminium solar***

large area inlay for dashboard, centre console, door trims and surrounding inlay. (Cannot be ordered in conjunction with grey interior equipment)

Inlays in aluminium delta

large area inlay for dashboard, centre console, door trims and surrounding inlay. (Can only be ordered in conjunction with grey interior equipment)

Aluminium solar*

Walnut, dark brown

Audi exclusive inlays
From quattro GmbH**Inlays in Beaufort oak**

large area inlay for the dashboard, centre console, door trims and surrounding inlay with aluminium-look surrounds; Beaufort oak is produced in an innovative procedure and consists of layered oak wood in a 2-colour design. In visual terms, this inlay is reminiscent of the styling of a yacht.

Inlays in walnut, dark brown

large area inlay for dashboard; also with aluminium-look trims for centre console, door trims and surrounding inlay

Inlays in fine grain ash, natural brown

large area inlay for dashboard; also with aluminium-look trims for centre console, door trims and surrounding inlay

Inlays in piano finish black

large area inlay for dashboard; for centre console, door trims and surrounding inlay also with aluminium-look trims. From quattro GmbH

Audi exclusive inlays

The following inlays are available: fine grain myrtle, nutmeg, modrone wood, gold, fine grain ash, wood nougat, vavona wood, bronze, tamo ash, dark brown natural and oak, sepia. From quattro GmbH

Cast aluminium wheels in 5-arm design
size 8 J x 18 with 235/55 R 18 tyres

Cast aluminium winter wheels in 5-arm design
size 7 J x 18 with 235/55 R 18 tyres, can be fitted
with snow chains, permissible top speed 210 km/h

Anti-theft wheel bolts

can only be loosened with the supplied adapter

Tyre repair kit

with 12V compressor and tyre sealant, located under the
loading floor cover in the luggage compartment, top
speed 80 km/h

Space-saving spare wheel

with compressor (can only be ordered in conjunction
with vehicle jack)

Tyre pressure loss indicator

visual and acoustic warning if the pressure drops in one
or more tyres; display in the driver information system

Vehicle tool kit

in the luggage compartment

Vehicle jack

in the luggage compartment

Cast aluminium wheels in 10-spoke design
size 8.5 J x 19 with 255/45 R 19 tyres

Cast aluminium winter wheels, 5-parallel-spoke design
size 8.5 J x 20 with 255/40 R 20 tyres,
permissible top speed 240 km/h

Cast aluminium wheels in 5-parallel-spoke design
size 8.5 J x 20 with 255/40 R 20 tyres

Lights**Headlights**

Halogen headlights using free-form technology with clear glass cover, electric headlight range control, daytime running lights and parking light function; front fog lights incorporated into the front apron panel

xenon plus

Headlights utilising durable gas discharge technology for dipped and high beam ensure intensive illumination of the road and provide good uniformity and range both close up and in the distance. The automatic and dynamic headlight range control prevents oncoming traffic from being dazzled; including all-weather light; daytime running lights and LED rear lights

LED headlights

featuring LED dipped beam, high beam, daytime running lights, indicators, static turning light, all-weather light and motorway light function with LED technology; includes high-beam assist for automatic switching between high and dipped beams, an all-weather light function to reduce the risk of the driver being dazzled when visibility is poor (in fog, rain or snow) and an additional motorway light which automatically increases headlight range from a speed of approximately 110 km/h; LED technology allows near daylight illumination of the road for increased safety and comfort; low energy requirements, long service life, and improved recognition by other road users.
(Including headlight cleaning system)

Headlight cleaning system

uses water and high pressure, for better illumination, less scatter and good visibility

adaptive light

including variable headlight range control
consisting of dynamic cornering light, static turning light and variable headlight range control; the dynamic cornering light infers the course of the road from the movement of the steering wheel and variably illuminates the bend by pivoting the xenon headlights; operational between speeds of approximately 10 km/h and 110 km/h. The static turning light automatically switches on if the indicators have been engaged for a while at a low vehicle speed and illuminates the new direction in which the vehicle is travelling. The variable headlight range control features a camera on the interior mirror which registers sources of light from other road users. The range and width of the headlight beam are continuously varied between dipped and high beam to suit ambient conditions, ensuring that the headlights provide good visibility without dazzling other road users. The headlights also have 3 different light distribution modes, which are activated depending on the vehicle speed: town light, motorway light and country light. In addition, Audi connect enables controlling of these 3 light distribution modes by the vehicle support system based on navigation data, and with the aid of stored route data from the optional MMI navigation plus with MMI touch. The convenient functions of the lighting assistant are supplemented by the intersection light, which provides a broad spread of light from the front lighting system, and by the travel mode, with GPS-assisted switching between right and left-hand drive modes. (Including headlight cleaning system)

High-beam assist

Part of LED headlights; working within system limits, automatically detects the headlights of oncoming traffic, the rear lights of other road users and built-up areas. Depending on the traffic situation, the high beam is automatically switched on or off.

Rear lights

Brake and tail lights with reversing lights and rear fog lights in halogen technology, rear number plate lights in LED technology

LED rear lights

Part of xenon plus and LED headlights; brake lights, tail lights and indicators in LED technology; faster activation means earlier recognition by the driver behind; reversing lights in white, 2 rear fog lights; 3rd high-mounted brake light in the rear window

Adaptive brake light

Brake light flashes during emergency braking to warn following traffic; hazard warning lights are activated automatically when the vehicle comes to a stop, hazard warning system activated according to the braking force

Light/rain sensor

automatically switches the dipped beam or windscreens wipers on/off depending on the light and rain conditions; includes delayed deactivation/automatic activation of the rear lights/number plate lights when parking/opening the vehicle

Interior and exterior lighting package

Interior: entrance lighting. In LED technology: front footwell, inside door handles, make-up lights, storage compartment in the centre console, ambient lighting of the centre console, ambient reflected light for inside door trims

Exterior: courtesy lighting on the underside of the door handles and door handle lighting in LED technology to facilitate entry and exit in the dark; automatically activated when the doors are unlocked; includes active internal door reflectors

Ambient lighting

additional to the interior and exterior lighting package, anti-glare illumination for the passenger compartment in LED technology. 2 reading lights at front and rear, lighting for door pockets, footwells and inside door handles, reflected lighting for centre console and door inner panels to help occupants better orient themselves, including eyewear compartment in the roof module. Surround lighting for centre console (floating effect) and active door reflectors, with illuminated door sill trims. Configured via MMI

Mirrors**Exterior mirror with integrated LED indicator**

Electrically adjustable and heated, convex, flat or aspherical mirror glass; housing painted in body colour; additionally with memory function if electrically adjustable front seats are ordered

Exterior mirrors

Convex, flat or aspherical mirror glass; housing painted in body colour. The automatic kerb-side function tilts the mirror downwards when reverse gear is engaged, giving the driver an optimum view of the kerb.

Choice of:

electrically adjustable, heated and folding, including automatic kerb-side function for the exterior mirror on the passenger side**electrically adjustable, heated and automatically dimming on both sides, automatically dimming interior mirror, including automatic kerb-side function for the exterior mirror on the passenger side****electrically adjustable, heated and folding, automatically dimming on both sides, automatically dimming interior mirror, including automatic kerb-side function for the exterior mirror on the passenger side****Interior mirror
dimming****Interior mirror automatically dimming**

recognises with the aid of a photocell when the headlights behind are too bright and dims automatically

Roof systems

Panoramic glass sunroof

2 sections, electrical activation to raise and open the front glass section, tinted glass insert; including an electrically operated sun blind for the front and rear passengers, convenient closing from the outside via the central locking system or radio-operated remote control; ensures a comfortable interior that is flooded with light; improved interior climate by means of efficient ventilation

Roof rails

with two webs, sturdy, aerodynamic shape; in black

Roof rails in anodised aluminium

Closing systems

Convenience key

Doors and tailgate can be opened and locked without actuating the remote control key carried. When the door handles or handle strip on the tailgate are touched, they unlock immediately. The vehicle is locked via a sensor button in the door handles.

Central locking

with radio-operated remote control integrated in the vehicle key, locks doors, tailgate and fuel filler cap; includes convenient closing/opening of windows and separate tailgate unlocking function via the radio-operated remote control; additional activation from inside on the driver's door

Engine start-stop button

The engine is started and switched off via the engine start-stop button in the centre console; the key only needs to be carried with you

Power-assisted closing for the doors

automatically pulls the doors into the locks when not fully closed

Tailgate with electric opening and closing function

opening via the radio-operated remote control, button in the driver's door panel or soft touch button in the tailgate handle recess. Closing via the button on the inside of the tailgate, the button in the driver's door or via the optional convenience key (long press), including power-assisted closing and programmable tailgate opening angle

Garage door opener (HomeLink)

Programmable radio-operated remote control, operating buttons incorporated into the front roof module; can be used to open many garage doors and exterior gates; allows control of security and lighting systems; with graduated programming assistance provided by the MMI, code identification guidance and set-up assistance from appropriate logbook information on the screen: user-friendly due to highly integrated networking with MMI. (For information on compatible hand-held transmitters, please contact your Audi partner or visit www.eurohomelink.com)

Anti-theft alarm

with tow-away protection via angle of inclination sensors (can be switched off); including interior monitoring system which can be switched off; signal horn for monitoring doors, bonnet and tailgate independent of vehicle electrical system

Preparation for tracking system

Preparation for the connection of a tracking system by means of which the vehicle can be located if stolen

Glazing

Heat-insulating glass

green tinted; windscreens made of laminated glass

Insulating/acoustic glass

2 panes of glass bonded together by a plastic film; improves exterior noise insulation and theft protection; with additional reflective coating to reduce the build-up of heat in the interior (rear window in standard glass), with viewing window for toll collection devices (varies by country)

Dark-tinted windows (privacy glazing)

Dark-tinted rear window, rear door windows and rear side windows

Insulating/acoustic glass and dark-tinted windows (privacy glazing)

Windscreens and front side windows in insulating/acoustic glass; dark-tinted rear window, rear door windows and rear side windows, windscreens with viewing window for toll collection devices (country-specific)

Sun visors

can be folded and swivelled; on the driver and front-passenger side with covered, illuminated make-up mirror

Sunblind

available as a manual version for the rear window and the rear door windows

Further exterior equipment

Provision for trailer towing hitch

includes wiring to the control unit, fitting for control units and adapted engine cooling. The set of parts for retrofitting is available from Audi Genuine Accessories.

Trailer towing hitch

Ball head and ball joint coupling made of forged steel. Mechanically swivelling ball head, operated via Bowden cable, with indicator light on Bowden cable and display in instrument cluster to monitor secure attachment of trailer towing hitch; includes trailer stabilisation system via the Electronic Stabilisation Programme (ESP)

Aluminium-look exterior

Roof rails, roof frame and window slot strips in anodised aluminium, exterior B and C-pillar trim in high-gloss black, door handles with decorative strip in aluminium look, sill with stainless steel inlay

Audi Singleframe

in aluminium look; one-piece trim frame around the radiator grille, with bright-metal Audi rings in the centre

Exhaust tailpipes

Dual-branch design, chrome-plated surrounds for exhaust tailpipes

Model name/logo

on the rear, "quattro" logo on the radiator grille, on the rear and on the passenger side of the dashboard

Seats/seating comfort

Rear seat backrest, folding

Can be split 40:60 or fully using the remote backrest unlocking function to fold the backrest conveniently and quickly. Lever is located in the luggage compartment side panel.

Rear seat system

3 seats, visually adapted to the front seats

Front seats, electrically adjustable

electric fore/aft, seat height, angle and backrest angle adjustment, 4-way lumbar support, driver seat with memory function

4-way lumbar support

electric, for driver and front-passenger seat, with horizontal and vertical adjustment

Centre armrest, front

one piece, adjustable angle

Centre armrest, rear

one-piece folding design, with storage compartment

Head restraints

for all 5 seats, height and reach manually adjustable; L-shaped head restraints at rear, for improved view to the rear

Massage function, front

massages the muscles using 10 pneumatic cushions; 5 different programs (Wave, Tapping, Stretch, Lumbar, Shoulder), each offering 5 levels of intensity can be selected via multifunction switches on the seat or via MMI. (Can only be ordered for comfort seats)

Seat ventilation, front

Active ventilation of the seat centre sections and thigh support for the driver and front-passenger seats; using a fan for standard seats or by drawing in air on comfort seats, the system ensures a pleasant seating climate can be enjoyed even at high ambient temperatures; adjustable in 3 stages directly on the air conditioning control. Note: if seat ventilation is fitted, the leather on the front and outer rear seats is perforated (Can only be ordered in conjunction with leather upholstery and trim)

Seat heating, front

heats the seat cushions and backrests, with sports seats or leather upholstery and trim also heats the seat side bolsters; can be individually adjusted in 3 stages for each seat via a direct selection button on the A/C control panel

Seat heating, front and rear

functions as for front seat heating; also for the outer rear seats, can be regulated separately

ISOFIX child seat mounting for the outer rear seats

Standard bracket for the practical fastening of child seats in accordance with ISO standards; compatible child seats can be obtained from your Audi partner.

ISOFIX child seat mounting for the front-passenger seat
with passenger airbag deactivation switch**Steering wheels/gear levers/controls****Leather-covered multifunction sports steering wheel in 3-spoke design**

with full-size airbag; multifunction operating concept for operation of MMI and radio and – if fitted – driver information system, telephone, audio sources and navigation; controls in aluminium look

Leather-covered multifunction sports steering wheel in 3-spoke design with shift paddles

with full-size airbag; multifunction operating concept for operation of MMI and radio and – if fitted – driver information system, telephone, audio sources and navigation; including shift paddles for changing gear with automatic transmission; control panel in aluminium look

Leather-covered multifunction sports steering wheel in 3-spoke design with shift paddles, heated

with full-size airbag; multifunction operating concept for operation of MMI and radio and – if fitted – driver information system, telephone, audio sources and navigation; including shift paddles for changing gear with automatic transmission; heated, control panel in aluminium look

Electric steering wheel adjustment

adjustable in height and reach, with automatic entry and exit function

Selector lever knob in leather

matched to the selected interior colour

Audi exclusive controls

Steering wheel rim and selector lever are trimmed with leather, individual choice of colour for leather and decorative seams from the range of Audi exclusive colours. From quattro GmbH

Audi exclusive steering wheel rim

Individual choice of leather colour for steering wheel and decorative seams from the range of Audi exclusive colours. From quattro GmbH

Steering wheel rim with wooden segments

available as leather-covered multifunction steering wheel in 4-spoke design with shift paddles, in walnut, dark brown. From quattro GmbH

Audi exclusive steering wheel rim with wooden segments

Customised steering wheel rim in Audi exclusive wood (not in tamo ash, natural dark brown), available in 4-spoke design, with shift paddles. See page 44 for the selection of Audi exclusive woods. From quattro GmbH

Selector lever knob with wooden segment

available in walnut, dark brown. From quattro GmbH

Audi exclusive selector lever knob with wooden segment

Customised selector lever knob with Audi exclusive wood (not in tamo ash, dark brown natural).

From quattro GmbH

Air conditioning**Deluxe automatic air conditioning**

with indirect ventilation and sunlight-dependent control, electronically regulates the air temperature, flow rate and distribution, separate temperature distribution for driver and front-passenger seat; recirculation mode, with humidity sensor and combined/fine particulate filter; ventilation in the rear via the centre console; key-coded settings

4-zone deluxe automatic air conditioning

In addition to the deluxe automatic air conditioning: front control panel with digital display, separate temperature control for driver and front-passenger seat and for rear passengers; additional air conditioning controls with digital display for climate control in the rear with separately adjustable temperature and blower settings and air distribution for the right and left-hand sides (rear functions can also be set from the front air conditioning controls); with additional air vents in the B pillars; automatic recirculation mode by means of air quality sensor, use of residual heat, separate regulation of footwell temperature, ventilated glove compartment; choice of 3 climates: gentle, medium and intensive

Auxiliary heating/ventilation

The auxiliary heating warms up the interior and removes ice from the windows without starting the engine; the auxiliary ventilation system supplies fresh air and reduces the temperature of the interior; with timer and departure time programming (an intelligent control function for time and energy-optimised calculation of heating duration); separate radio-operated remote control with illuminated display; choice of 2 heating modes: "defrost" (defrosting mode only for the windows), "warm" (warming up mode to additionally preheat the interior)

Luggage securing and storage systems**Storage compartments**

Storage nets on the front seat backrests, drawers under the front seats and storage compartments in the front doors for the storage of bottles of up to 1 litre; storage compartments in the centre console and a 12V socket

Glove compartment

on the front-passenger side, lockable, large, with light and holder for writing utensils

Storage package

consisting of 2 cup holders in the rear centre armrest, luggage net for luggage compartment and two 12V sockets in the rear

Cup holders

2, integrated into front centre console

Bag hooks

on the left and right-hand sides of the luggage compartment

Partition net

for fastening to the bodywork or to the folded-down rear seats, useful when the rear seats are up or folded down on one side, as well as when they are completely folded down; removable

Reversible mat

for the luggage compartment, velour on one side, rubber on the other, to cover the luggage compartment even when rear seats are folded down, with fold-out cover for loading sill and bumper

Double loading floor

with deep dirt-collecting tray beneath, easy to clean; for the transportation of soiled items. The dirt tray is replaced by a dirt cover if the space-saving spare wheel with standard tyre option is selected.

Load-securing kit

for the rail system in the luggage compartment, with telescopic rod and attachment strap, for individual partitioning of the luggage compartment and for securing objects

Through-loading facility with removable ski and snowboard bag

for practical transportation of long objects e.g. up to 4 pairs of skis or 2 snowboards; unrestricted use of the outer rear seats

Rail system

in the luggage compartment, 4 lashing eyes in the rail system, can be individually positioned for securing loads

Luggage compartment

large-volume with large load-through width; includes side net on the right-hand side; 4 lashing eyes on the luggage compartment floor, with 12V socket

Further interior equipment

Vimentum floor mats

in high-quality jacquard fabric front and rear, matched to the selected interior colour

Floor mats, front and rear

in velour, black

Audi exclusive carpet and floor mats

Individual choice of colour for carpets, floor mats and piping from the range of Audi exclusive colours. From quattro GmbH

Door sill trims with aluminium inlay

on the door sills with "allroad" logo

Cigarette lighter and ashtray

illuminated, front and rear. If not required: 1 storage compartment and one 12V socket additionally

MMI® and navigation systems

MMI® radio

Integrated operating concept, comprising the MMI terminal (operating unit) and electrically extending MMI display (6.5-inch colour display on the dashboard), radio with phase diversity, CD player (MP3, WMA-capable), 8 passive loudspeakers at the front and rear, total output 80 watts

MMI® radio plus

As MMI radio, plus 2 SDHC memory card readers (up to 32 GB), single-CD player and memory card reader support MP3, WMA and AAC, including Audi sound system, Bluetooth interface, driver information system, car menu, TP memo (automatically saves traffic news when driving) and AUX-IN connection

MMI® navigation

with navigation data (SD card), 6.5-inch TFT colour display for the MMI with high-quality map representation and numerous detailed display options, voice control (whole-word input), dynamic TMC route guidance (where available), additional arrow display in the driver information system; including MMI radio plus

Navigation data (SD card)

contains navigation data for the following countries (where digitised): Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain, Sweden, Switzerland, Ukraine, UK, the Vatican City;

MMI® touch

Part of MMI navigation plus; touch-sensitive control panel for intuitive operation of the MMI; letters and numbers can be entered without drivers taking their eyes off the road; contextual entry of letters and numbers for navigation destinations via handwriting recognition, selection from address book or entry of telephone numbers with acoustic acknowledgement, simple movement of navigation map and selection of points of interest; retrieval of 6 freely assignable radio station pre-sets

MMI® navigation plus with MMI® touch

including navigation data (hard drive), high-resolution 8-inch TFT colour display with high-quality map display and topographical map colouring, display of lots of sightseeing information and city models in 3D, choice of 3 alternative routes according to route settings (fast/short/economical), scrolling along the route and manoeuvring within the map, spoken TMCpro reports, split-screen route information (manoeuvring points, points of interest on motorways, TMCpro on route), detailed junction map, motorway exits and lane recommendations also in driver information system, dynamic route guidance with TMCpro (where available), vehicle support and speed limit display based on navigation data function, destinations can also be entered via the voice control system (whole-word entry of address in one sentence) or the MMI touch; including MMI radio plus, driver information system with 7-inch colour display and MP3, WMA, AAC and MPEG-4-compatible DVD player; hard drive can also be used to store music (20 GB). The use of Audi connect services (e.g. navigation using Google Earth images and Street View, weather and news, Audi traffic information online) is possible in combination with Bluetooth car phone online.

Navigation data (hard drive)

contains navigation data for the following countries (where digitised):

Europe: Albania, Andorra, Austria, Belarus, Belgium, Bosnia-Herzegovina, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Gibraltar, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Macedonia, Moldova, Monaco, Montenegro, the Netherlands, Norway, Poland, Portugal, Romania, Russia, San Marino, Serbia, Slovakia, Slovenia, Spain (including the Canary Islands), Sweden, Switzerland, UK, Ukraine, the Vatican City

America: Canada, Mexico, USA (including Alaska, Hawaii, Puerto Rico, Virgin Islands)

Asia: China, Hong Kong, Japan, Macau, Malaysia, Singapore, South Korea

Other countries: AGCC (Bahrain, Kuwait, Oman, Qatar, Saudi Arabia, United Arab Emirates), Australia, New Zealand, South Africa

Driver information system

Part of MMI radio plus and MMI navigation, with white 5-inch TFT monochrome display located directly in driver's field of vision, displays the radio frequency, station name or track title and other data from the MMI system such as navigation, GPS clock or telephone menu (if fitted), display of trip computer with long and short term memory, incl. a graphic consumption display, digital speedometer, door/luggage compartment open warning indicator. The integrated efficiency program provides assistance in the form of consumption data overviews, a display of additional consumers and fuel-saving tips for a more economical driving style; operated via a leather-covered multifunction steering wheel, incl. attention assist

Driver information system with 7-inch colour display

Part of MMI navigation plus with MMI touch; high-resolution TFT colour display located directly in the driver's field of vision; displays, in addition to driver information system, information from driver assistance systems, the media being used, gear, outside temperature and other display content of the MMI system – if fitted – navigation, night vision assistant and telephone menu. The integrated efficiency programme provides assistance in the form of consumption data overviews, a display of additional consumers, an enlarged gearshift display and fuel-saving tips for a more economical driving style; very clearly arranged with easily readable header and status lines (tab concept) and automatic brightness adjustment; operated via a leather-covered multifunction steering wheel, including attention assist

Attention assist

Part of the driver information system; the attention assist analyses driving behaviour using a range of sensors and warns drivers if anything indicates that they are starting to become inattentive. Steering movements and switch/pedal actuation are recorded and compared with the individual driving patterns of the respective driver. Attention assist warns the driver by means of a display in the driver information system and an acoustic signal. The system is active from 65 km/h and can be deactivated at any time via the car menu.

Centre display

with monochrome readout for ambient temperature, range and radio frequency, gear display, service indicator, oil pressure, brake fault, coolant level/temperature, brake pad wear, door-open pictogram, fuel level warning

Radio and TV systems**Digital radio reception**

In addition to the range of analogue stations, programmes from digitally broadcast radio transmitters with better sound quality can be received according to DAB standard, including DAB+ and DMB audio. Display of additional information accompanying the programme (e.g. artist, title, cover) in the form of a slide show and other programme-independent data services such as weather, traffic, news. In conjunction with MMI navigation plus, a 2nd DAB tuner permanently searches for alternative reception frequencies of the set radio station; at the same time the station list is updated. Please note: reception depends on local digital network availability; contents and scope of the additional information depend on provision by the respective radio section.

Digital TV reception

Reception of digitally broadcast (DVB-T), uncoded television stations (MPEG-2 or MPEG-4 standard), supports DVB-T audio transmitters, teletext and Electronic Programme Guide (EPG). External AV-IN connection via adapter cables (available via Audi Genuine Accessories). Please note: TV reception depends on digital network availability; no picture possible when the vehicle is moving

Audi sound system

Part of MMI radio plus, MMI navigation and MMI navigation plus with MMI touch; 6-channel amplifier, 10 loudspeakers delivering outstanding sound, including centre speaker in the dashboard, subwoofer in the spare wheel well, total output 180 watts

BOSE Surround Sound

Surround sound reproduction with 14 loudspeakers including centre speaker in the dashboard and subwoofer in the spare wheel well; 2 surround sound speakers in the D-pillar; 12-channel amplifier with over 600 watts of total output; AudioPilot® for noise-dependent volume adjustment; powerful and accurate bass reproduction, lifelike sound with natural tone and a feeling of space for an impressive sound experience; sound system very well matched to the interior acoustics of the vehicle. Reproduction of 5.1 surround sound is possible in conjunction with MMI navigation plus with MMI touch.

Bang & Olufsen Advanced Sound System

Surround sound reproduction with 15 loudspeakers including subwoofer and centre speaker, each with its own amplifier channel; polished loudspeaker covers in aluminium; automatically extending acoustic lenses for excellent sound performance and perspective from every seat; 10-channel DSP all-digital amplifier; all-digital highly efficient 5-channel ICE Power amplifier for woofers and subwoofers; with total output of over 1,200 watts; 5.1 surround sound reproduction possible; privacy function: encapsulated loudspeaker casings minimise escape of sound to the outside of the vehicle and provide privacy, for example when making telephone calls in hands-free mode; this also increases the precision of the loudspeaker effect; noise-dependent volume adjustment

CD changer

in the glove compartment, for 6 CDs, MP3 and WMA compatible, shock resistant, no cartridge, CDs can be loaded and changed individually. Music files with digital rights management (DRM) cannot be played.

DVD/CD changer

in the glove compartment, for 6 DVDs or CDs, supports e.g. audio CDs, video DVDs and MP3, WMA, AAC, MPEG-4; supports up to 4,000 tracks per medium; shock-resistant, without magazine, DVDs and CDs can be changed individually; fast forward and rewind, random playback possible. Music files with digital rights management (DRM) cannot be played.

Audi music interface

for the connection of Apple iPods from generation 4, Apple iPhones (music functionality) as well as USB storage media and MP3 players. The Audi music interface is housed in the centre console; it is operated via the MMI or the leather-covered multifunction steering wheel. Please note: can only be used in conjunction with a special adapter cable (available from Audi Genuine Accessories). Please contact your Audi partner or visit www.audi.com/mp3 for information on compatible MP3 players

Adapter cable set for Audi music interface

consisting of 2 connection cables for the connection of iPod/iPhone or storage media/media player with USB connection (type A); further adapter cables available from Audi Genuine Accessories. Visit audi.com/mp3 for information on compatibility

Adapter cable set plus for Audi music interface

consisting of 2 connection cables for the connection of iPod/iPhone or storage media/media player with USB connection (type A); further adapter cables available from Audi Genuine Accessories; supports the display of Cover Arts and video functions; depends on the iPod used; can only be used in conjunction with more recent iPod generations. Visit audi.com/mp3 for information on compatibility

Preparation for Rear Seat Entertainment

includes pre-installed wiring and mounts for the holders in the driver and front-passenger seat backrests. The appropriate Rear Seat Entertainment package (tablet player with holder) is available as a plug-and-play unit from Audi Genuine Accessories.

Telephone and communication**Bluetooth interface**

part of MMI radio plus, MMI navigation and MMI navigation plus with MMI touch; Bluetooth-compatible mobile phones can be connected to the vehicle via the interface; hands-free calls in the vehicle via the microphone. Including Bluetooth audio streaming (depending on mobile phone compatibility). Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones. (Can only be ordered in conjunction with MMI navigation plus)

Preparation for mobile phone (Bluetooth)

includes a hands-free facility (including voice control for the telephone functions) and a preparation for an optional mobile-specific charger (available from Audi Genuine Accessories) with a connection to the external aerial (via the base plate including adapter); operation via the MMI, the leather-covered multifunction steering wheel or the speech dialogue system; situated in the centre armrest; for information on compatible mobile phones, please contact your Audi partner or visit www.audi.com/bluetooth

Bluetooth car phone online

Your Bluetooth-capable mobile phone can be conveniently connected to the vehicle's internal UMTS module (provided: the mobile phone has a SIM Access Profile), additional SIM card reader located in the surround of the MMI navigation plus. Transfer of phone book entries to the vehicle and management of call lists. Including the Audi connect services traffic information online^{1, 2}, point-of-interest search, navigation by means of Google Earth images and Street View, destination entry, information services e.g. weather and Wi-Fi hotspot for Internet access in the rear using a mobile end device (e.g. laptop). Because of the high data volumes (currently concerns in particular navigation with the aid of Google Earth images and Wi-Fi hotspot), a mobile phone contract including a data flat rate is strongly recommended! Online services are only available for mobile phone contracts including a data option and only within the coverage of the mobile phone network; they are only offered in Europe (in Russia only in the Moscow and St. Petersburg areas; not in Turkey, Cyprus, Malta and Iceland); there will be additional costs for the use of these services (charges and billing correspond to the personal mobile phone contract); the content and scope of the online-based services offered may vary. Simple operation via the MMI navigation plus, the leather-covered multifunction steering wheel or the voice control system. Please contact your Audi partner or visit www.audi.com/bluetooth for information on compatible mobile phones. (Can only be ordered in conjunction with MMI navigation plus)

Handset for the Bluetooth car phone online, front
with colour display and integrated SIM card reader, for making private phone calls; easy writing of text messages thanks to automatic word recognition

Assistance systems

adaptive cruise control with Stop & Go function

inc. Audi pre sense front

Automatic distance control (control range 0–250 km/h); working within system limits, it uses 2 radar sensors and a camera to detect vehicles ahead and maintains the distance by automatic braking and accelerating; independent braking to a stop, automated restart at driver's request; 4 distance levels and 4 driving modes (efficiency, comfort, dynamic and auto) can be selected individually. In addition to the functions of Audi pre sense basic, Audi pre sense front implements preventive occupant protection measures when threatened with an imminent frontal collision. Working within system limits, Audi pre sense front uses the front sensors of adaptive cruise control with Stop & Go function for the detection; including Audi braking guard with warning for driver from an enhanced brake assist and preventative occupant protection in case of an imminent collision with a vehicle travelling in front provided by observation of surroundings. Extension by the function of full braking action: this is initiated at speeds below 30 km/h if there is a danger of collision with a stationary or moving vehicle in order to avoid this collision if possible. Audi pre sense plus is included if Audi side assist is also ordered. In addition to the functions of Audi pre sense front, Audi pre sense plus activates the Audi braking guard also in certain situations at higher speeds when a collision is unavoidable and initiates a full braking action to minimise the severity of the crash by a reduction of the speed of up to 40 km/h. The use of Audi connect functions is possible in conjunction with MMI navigation plus: due to route data stored in the navigation system such as the sweep of bends and corners or road classifications an even more comfortable distance control is possible, for example if you drive again on the same winding roads. Note: ACC can now also be activated through Audi drive select

Audi pre sense basic

Networking the different vehicle systems enables driving situations to be categorised and, where necessary, actions to be implemented for preventive occupant protection. These include: belt tightening, activating the hazard warning system and closing the windows and – if fitted – sliding roof

Audi side assist including Audi pre sense rear

lane change assistant, within system limits, assists the driver when changing lanes (operating range 30 – 250 km/h). Displays are incorporated into both exterior mirrors. Audi side assist uses 2 radar sensors to measure the vehicle's distance from other vehicles it has detected as well as the speed difference between them. If Audi side assist classifies the speed difference and distance as being critical in the event of a lane change, a display will appear in the respective exterior mirror. In addition to the functions of Audi pre sense basic, Audi pre sense rear, working within system limits, uses the rear sensors of Audi side assist to detect a possible rear-end collision. Audi pre sense plus is included if Audi adaptive cruise control with Stop & Go function is also ordered. In addition to the functions of Audi pre sense front, Audi pre sense plus activates the Audi braking guard in certain situations in which a collision is unavoidable and initiates a full braking action to minimise the impact speed of the crash by up to 40 km/h.

Audi active lane assist

lane compliance assistant, supports the driver within system limits comfortably in keeping in the lane (operating range 60– 250 km/h). If the system is activated and ready and the driver has not operated the indicators, the Audi active lane assist will guide the vehicle within recognised lane boundary lines by means of gentle, corrective steering intervention; the driver can choose whether he would like to be monitored continuously or just shortly before crossing the traffic lane marker (choice of earlier or later steering time); additional steering vibration can be adjusted if the driver wishes; additional display in the head-up display (can be ordered as an option)

Night vision assistant

with highlighting of detected pedestrians

with integrated thermal imaging camera; when driving at night, this system extends the driver's range of visibility beyond the light provided by the dipped beam; records thermal images; an image processing algorithm then evaluates the camera's data and marks any persons it has detected in yellow in the optional driver information system's colour display; the marking changes to red and a warning tone is emitted if the system, by analysing the movement and position of the person it has detected, considers that there is a possible risk. Additional warning symbol in the head-up display (can be ordered as an option). Image quality is affected in poor ambient conditions

Head-up display

projects as required information relevant to the driver from the assistance systems, navigation or warning symbols onto the windscreen in the driver's direct field of vision; height adjustable; provides a multi-coloured display with good contrast and minimal distraction from the road

Speed limit display

Camera-based recognition and display of speed limits, including temporary speed limit displays (e.g. above motorways). Additionally, working within system limits, there is an evaluation of the particular situation in wet conditions, and speed limits displayed depending on the time of the day, road works and when using a trailer. If a sign has not been recognised by the camera, thanks to Audi connect, the speed limit displayed can be taken from the navigation data of MMI navigation plus (if fitted). Additional display in the head-up display (can be ordered as an option)

cruise control

maintains any speed above around 30 km/h, provided engine power output and engine braking effect permit; operation via separate steering column stalk

Hold assist

holds the vehicle stationary for unlimited periods after stopping on normal uphill and normal downhill gradients. The system is activated by push-button and allows the driver to drive away easily and comfortably without having to operate the electromechanical handbrake

Hill descent control

maintains selected speed on downhill drives

Tilt angle display

shows the tilt of the vehicle both sideways and lengthways independently of acceleration in the MMI display. Informs the driver by means of visual signals of a tipping hazard at a vehicle angle of more than 25° or 35° in 2 stages and starts automatically with the hill descent control

Parking system plus

Acoustic and visual park assist system for the front and rear with MMI screen display; measurement is by ultrasonic sensors concealed in the bumpers

Parking system plus with rearview camera

Acoustic and visual parking aid for front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent); includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, rearview camera concealed in the handle strip of the tailgate

Parking aid plus with 360 degree cameras

Acoustic and visual parking aid for the front and rear, image of area behind the vehicle shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent), includes help lines and guidelines and identification of point at which to apply opposite lock when parallel parking, rearview camera concealed in the handle strip of the luggage compartment lid, display modes for front side left/right and rear side left/right for safe pulling out of narrow parking spaces, courtyard entrances or in the parking garage, additional display mode for the surroundings as virtual overhead view of the vehicle (bird's eye perspective), wide-angled cameras cover the entire area around the vehicle. The driver can select between the different image views in the MMI display, based on the data from the camera. Reversing image with switchable help lines for cross- and kerb-side parking, and for attaching trailers, front camera image, from across and behind, surrounding image

¹ Audi traffic information online is available to you in the following countries: Germany, Austria, Switzerland, Belgium, Luxembourg, France, Italy.

² The right to use Audi traffic information online for 36 months from initial activation without additional charges. Your Audi partner will be happy to inform you about possible extension options and any costs these may incur.

Park assist function with display of surroundings

searches for suitable parking space along the road by means of ultrasonic sensors, calculates the ideal parking path for cross parking spaces and for kerb-side parking spaces the ideal path for parking and leaving and performs the steering action almost automatically. Parking is now even possible in smaller parking spaces and curve areas, parking in several moves is supported. Steering is done by the vehicle, while the driver only needs to accelerate and apply the brakes. The display of surroundings registers and warns of obstacles at the side depending on the steering angle and supports safe and scratch-free parking and leaving a parking space by providing the correct steering angle.

Park assist function with display of surroundings and rearview camera

searches for suitable parking space along the road by means of ultrasonic sensors, calculates the ideal parking path for cross parking spaces and for kerb-side parking spaces the ideal path for parking and leaving and performs the steering action almost automatically. Parking is now even possible in smaller parking spaces and curve areas, parking in several moves is supported. Steering is done by the vehicle, while the driver only needs to accelerate and apply the brakes. The display of surroundings registers and warns of obstacles at the side depending on the steering angle, and supports safe and scratch-free parking and leaving a parking space by providing the correct steering angle, in addition, an image of the area behind the vehicle is shown on the MMI display, with dynamic display modes showing the calculated path (steer-angle dependent) including help lines and guidelines and identification of the point at which to apply opposite lock when parallel parking, rearview camera concealed in the tailgate handle strip

Park assist function with display of surroundings and 360 degree cameras

searches for suitable parking space along the road by means of ultrasonic sensors, calculates the ideal parking path for cross parking spaces and for kerb-side parking spaces the ideal path for parking and leaving and performs the steering action almost automatically. Parking is now even possible in smaller parking spaces and curve areas, the search for a parking space at higher speed and parking in several moves is supported. Steering is done by the vehicle, while the driver only needs to accelerate and apply the brakes. The display of surroundings registers and warns of obstacles at the side depending on the steering angle and supports safe and scratch-free parking and leaving a parking space by providing the correct steering angle.

Suspensions/brakes

Audi drive select

changes vehicle characteristics, e.g. by adapting power steering assistance, accelerator, gearshift characteristics, and adaptive air suspension; modes available: comfort, auto, dynamic and individual. The system also influences other optional equipment. efficiency mode shifts the engine, transmission, optional adaptive cruise control and climate control into an improved basic setting.

Dynamic steering

When changing lanes, parking and cornering, this system improves comfort and handling by dynamically regulating steering according to the driving situation. In addition to adaptation of the steering effort, the steering angle is also adapted (steering ratio). The system is also supported further by vehicle stabilisation through ESP.

adaptive air suspension

Electronically controlled air suspension with infinitely variable adaptive damping system on all four wheels; automatically regulates vehicle ride height and damping; includes ride height control and manual lift function; different modes selected via Audi drive select (dynamic, automatic, comfort, allroad, lift)

Brake system

with Anti-lock Brake System (ABS), Electronic Brake-force Distribution (EBD) and hydraulic brake assist, ventilated disc brakes front and rear, rear brakes with electromechanical parking brake

Electromechanical parking brake

with hold assist; includes parking brake function when stationary, drive-off assistance function through automatic release when driving away and emergency braking function whilst driving acting on all 4 wheels

Technology/safety

Body, galvanised

Lightweight aluminium hybrid construction; fully-galvanised in areas at risk from corrosion, unitary construction, welded to the floor pan, front and rear areas feature defined crumple zones. (12 year warranty against rust perforation)

Side impact protection

Front and rear aluminium impact bars integrated into the doors

Child-proof lock

Electric child-proof lock on the rear doors, operated via the child-proof lock buttons in the driver's door armrest, additional electric child-proof lock for the rear windows

Full-size airbags

for driver and front passenger, 2-stage deployment depending on the strength of impact and height of the person; front side airbags incorporated into the seat backrests; head airbag system protects front and outer rear passengers in the event of a side impact, unfolds as a protective cushion over the side windows

Side airbags

front, incorporated into the seat backrest

Side airbags, rear

for the outer seats, incorporated into the seat backrests; supplements the side-on collision protection in the doors and the head airbag system

Integrated head restraint system

In the event of a rear-end collision, the design of the seat restrains the upper torso and supports the head at an early stage, thereby increasing safety and reducing the danger of whiplash.

Instrument cluster

with controllable lighting, coolant temperature display, fuel gauge, rev counter with digital clock, speedometer with disproportionate display and electronic odometer/trip odometer, displays for radio frequency, ambient temperature and tank range, warning and control lights, maintenance interval display

Safety steering column

increases the safety potential of the seat belt and airbag

Battery energy management

controls the supply of electrical power to the vehicle whilst driving and when parked

Seat belts

3-point inertia reel seat belts; reversible belt tensioners, adaptive belt force limiters and belt height adjustment/belt buckle status query at front; seat belt reminder function for driver and front-passenger seats with acoustic and visual warning signal; belts matched to the interior colour

Audi exclusive seat belts

Individual choice of colour for seat belt from the range of Audi exclusive colours. From quattro GmbH

Seat belt reminder

for the driver and front-passenger seats; an acoustic and visual warning signal reminds you to fasten your seat belt.

Warning triangle

with bracket on the inside of the tailgate

First-aid kit

in the storage compartment of the rear centre armrest

Fuel tank

75 l

Anti-lock Brake System (ABS)

with Electronic Brake-force Distribution EBD and hydraulic brake assist

Anti-Slip Regulation (ASR)

for good traction and lateral stability, reduces spinning of the drive wheels

Electronic Differential Lock (EDL)

On surfaces with varying levels of grip, this start-off assistant automatically brakes the drive wheels on the surface that is too slippery, thereby ensuring smooth, powerful progress.

Electronic Stabilisation Programme (ESP)

networks the ABS, EBD, ASR and EDL with its own sensors and compares driving data with reference data; provides better stability at all speeds by targeted braking of individual wheels and intervention in the engine management system

Wheel-selective torque distribution

incorporated into ESP; modifies driving force by means of targeted braking actions depending on the driving situation, when cornering the torque distribution ensures smoother and more precise handling with no understeering; improved traction and dynamic performance when cornering

Electromechanical power steering

maintenance-free rack & pinion steering with speed-dependent servo assistance; precise steering feel at high speeds, excellent assistance when parking; active countersteering providing steering assistance to the driver for enhanced vehicle stability

S tronic

The 7-speed dual clutch transmission with electrohydraulic actuation facilitates shorter gearshift times and gearshifting with hardly any perceptible break in propulsive power: can be operated via the shift paddles behind the steering wheel or the gear lever knob; in automatic mode the driver can choose between two programs D (normal) and S (sports)

tiptronic

6-speed automatic transmission with dynamic shift program and sport program; hydraulic torque converter with controlled lockup clutch

quattro®

permanent all-wheel drive with self-locking centre differential and torque distributed individually to each wheel; distributes the driving forces depending on the driving situation to each individual wheel for precisely controlled handling

quattro® with sports differential

The electronically regulated sports differential distributes variable amounts of driving force to each rear wheel and ensures remarkable acceleration performance in corners and stabilises the vehicle's response to load change; also improves direct steering characteristics and provides more agile handling due to the lower steering effort required

Recuperation

Increasing the generator voltage converts kinetic energy into usable electrical energy when the vehicle is coasting or braking. This energy is used to assist the generator during subsequent acceleration, saving up to 3% fuel.

Start-stop system

helps to reduce fuel consumption and CO₂ emissions by switching off the engine in stationary phases, e.g. at traffic lights. The start process is initiated as soon as the foot brake is released for a perfect getaway. Can be deactivated at any time via the switch

Audi Extended Warranty**Audi Extended Warranty**

can only be ordered directly and on purchase of a new car; is a consistent continuation of the manufacturer's guarantee so that you are protected against risk and can control servicing costs even after the first 2 years.

There is a total of 9 lifetime/total mileage combinations to choose from:

Additional 1 year Audi Extended Warranty,
maximum total mileage 30,000 km

Additional 1 year Audi Extended Warranty,
maximum total mileage 60,000 km

Additional 1 year Audi Extended Warranty,
maximum total mileage 90,000 km

Additional 2 years Audi Extended Warranty,
maximum total mileage 40,000 km

Additional 2 years Audi Extended Warranty,
maximum total mileage 80,000 km

Additional 2 years Audi Extended Warranty,
maximum total mileage 120,000 km

Additional 3 years Audi Extended Warranty,
maximum total mileage 50,000 km

Additional 3 years Audi Extended Warranty,
maximum total mileage 100,000 km

Additional 3 years Audi Extended Warranty,
maximum total mileage 150,000 km

Notes

¹ The figure stated was calculated using the specified measuring procedure (current version of Directive 80/1269/EEC).

² Unladen vehicle weight includes driver (68 kg), 7 kg of luggage and fuel tank 90% full, calculated in accordance with the current version of EC Directive 92/21/EEC. Optional equipment may increase the car's unladen weight and drag coefficient, whereupon the possible payload limit and the top speed will be reduced accordingly.

³ The engine's power output always decreases with increasing altitude. At 1,000 m above sea level, and for every additional 1,000 m, deduct 10% from the weight of the outfit (trailer load limit + gross weight of the towing vehicle). Figure for trailer load limit applies to factory-fitted trailer towing hitch. If using the vehicle with a trailer towing hitch for commercial purposes, a digital tachograph may be required under certain conditions.

⁴ A vehicle's fuel consumption and CO₂ emissions do not just depend on how efficiently the vehicle uses the fuel, but are also influenced by driving behaviour and other non-technical factors. CO₂ is the greenhouse gas primarily responsible for global warming.

⁵ Regulated.

⁶ We recommend using sulphur-free super unleaded RON 95 in accordance with DIN EN 228. If this is not available, use sulphur-free regular unleaded RON 91 in accordance with DIN EN 228; power output will be slightly reduced. Unleaded RON 95 fuel with a maximum ethanol content of 10% (E10) can generally be used. Fuel consumption details refer to operation with RON 95 fuel in accordance with 692/2008/EC.

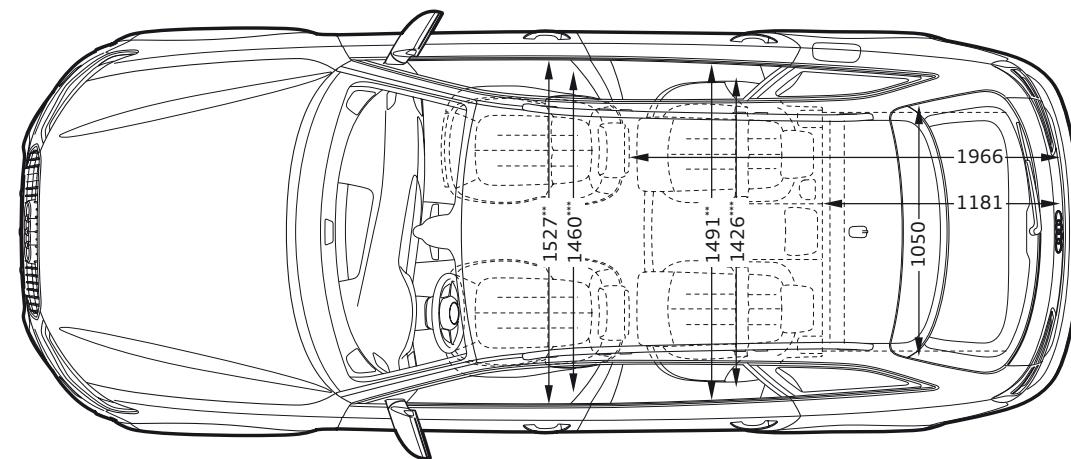

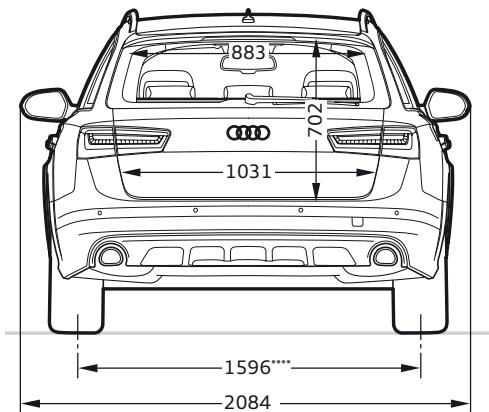

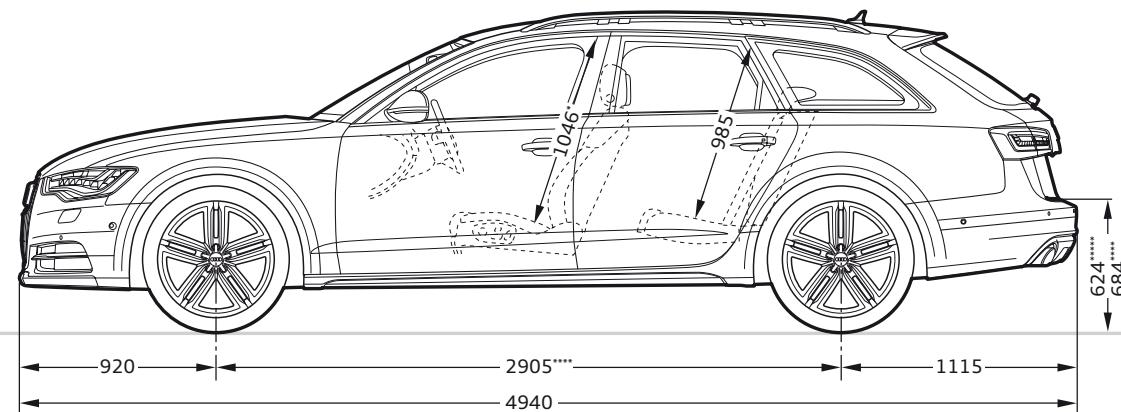

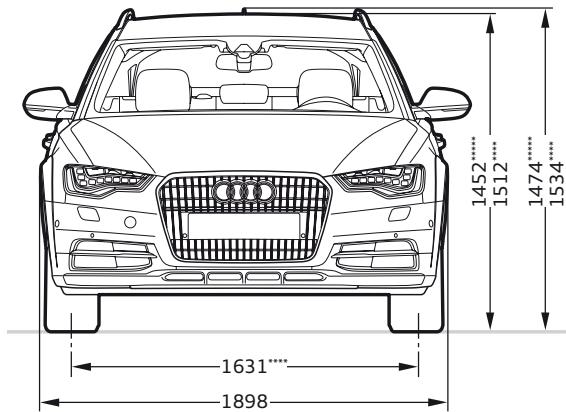

⁷ We recommend using sulphur-free diesel in accordance with DIN EN 590. If this is not available, use diesel in accordance with DIN EN 590.

⁸ The figures given were calculated using the specified measuring procedures. The figures do not refer to one individual vehicle and do not form part of any offer, but rather should be used purely for purposes of comparison between the different vehicle models.

Important note

Inspections are due as shown by the service display.

Audi A6 allroad quattro

**Dimensions in millimetres.**

Dimensions were measured with vehicle at unladen weight, ground clearance measured with vehicle carrying its maximum load.

Luggage compartment volume 565/1680 l (measured by the VDA standard test method using 200 x 100 x 50 mm blocks;

2nd value: is with the rear seat back folded down and the vehicle loaded up to roof height). Turning circle approx. 11.9 m. *Maximum headroom.

Elbow room width. *Shoulder room width. ****lift-mode. *****dynamic-mode.
